

FOR IMMEDIATE RELEASE

## Easymarking.ai Launches AI-Powered Grading Assistant to Help Teachers Save 8 Hours a Week

Hong Kong, 8th of June 2025 - Easymarking.ai, a trailblazer in educational technology, is revolutionizing classroom assessment with its AI-powered grading platform designed to save teachers up to 8 hours per week. Tailored for DSE, MYP/IB, and IGCSE, the software offers rubric-based marking, personalized student insights, and a seamless workflow that brings efficiency and clarity to written assessments.

Easymarking.ai empowers educators by transforming how essays are graded. Teachers upload assignments and rubrics in just minutes, and the platform highlights errors directly on student work-linked precisely to rubric criteria. Teachers retain full control by reviewing and approving feedback before sharing it with students digitally or in print.

But the innovation doesn't stop at speed. Easymarking.ai delivers individualized learning diagnostics, identifying each student's most common mistakes, strengths, and areas for improvement. These insights enable teachers to deliver targeted worksheets and focused support, enhancing the learning journey for every student.

"Our mission is simple: free teachers from tedious marking so they can focus on what matters most-teaching," said Aaron Yee, co-founder of Easymarking.ai.

### Key Features:

- Rubric-Based AI Marking: Supports DSE, IB/MYP, and IGCSE rubrics for consistency.
- Student Insights: Tracks strengths, weaknesses, and progress.
- 3-Step Workflow: Upload -> Approve -> Share-done in under 10 minutes.
- Flexible Output: Share as digital links or printable PDFs.
